## HINDOO CONES

This is a very clever piece of apparatus for a conjurer. There are four brightly polished metal cones, which are placed upon the table. A half-crown or any other coin or small object is hidden underneath one of the four cones while your back is turned, or while you are absent from the room, yet you are always able to detect under which cone the article has been hidden. No skill and no previous practice is needed; it is all in knowing the secret of the trick which, for obvious reasons, you are requested to keep to yourself. It never fails. No one else is able to do it, except by chance, but YOU can detect the right cone every time. The effect is greatly enhanced by using two sets. A double set of eight cones with one or two, or even more, hidden objects, will greatly heighten the mystery and create a much better demonstration of your "occult" powers.
